

TAMILARASAN G

Java Software Development Engineer

☎ +91-7339608629 ✉ tamilarasang17@gmail.com 🔗 [linkedin.com/in/tamilarasan071](https://www.linkedin.com/in/tamilarasan071)

Summary

Java Software Development Engineer with strong proficiency in Data Structures and Algorithms (solved 200+ problems on GeeksforGeeks). Hands-on experience in Java, Spring Boot, MERN Stack, SQL, RESTful APIs, MongoDB, and full-stack development. Skilled in building scalable applications, optimizing database performance, and writing clean, maintainable code in Agile environments.

Skills

Programming Languages: Java, JavaScript

Backend Technologies: Core Java, Spring Boot, Spring Security, JWT Authentication, Express.js, RESTful APIs

Frontend Technologies: React.js, HTML5, CSS3, Tailwind CSS

Databases & Persistence: MySQL, MongoDB, JDBC

Core CS Concepts: Data Structures, Algorithms, Object-Oriented Programming, Database Design

Experience

Java Full Stack Development Intern

March 2026 – May 2026

Infotact Solutions, Remote

Tools Used: Java, Spring Boot, React.js, MySQL, Docker

- Developed **2 real-world full-stack web applications** using Java Spring Boot, React.js, and MySQL, implementing scalable RESTful APIs and responsive user interfaces.
- Enhanced application security and role-based access control by implementing **Spring Security and JWT**-based authentication and authorization mechanisms, securing **10+ protected API endpoints**.
- Performed **WebSocket (STOMP)** integration for real-time communication, enabling instant updates and reducing data refresh latency by **80%**.

Full Stack Development Intern (Python)

June 2023 – July 2023

Live Stream Technologies, Coimbatore

Tools Used: Python, HTML, CSS, JavaScript

- Designed and developed **3+ scalable web applications**, improving system performance by 30% through backend optimization.
- Built and integrated **5+ RESTful APIs**, reducing data retrieval time by 40% via optimized database queries.
- Collaborated in **10+ Agile sprint cycles**, contributing to a 15% improvement in feature delivery timelines.

Projects

Online Turf Booking System | HTML, CSS, JavaScript, Express.js, MongoDB | [Live Project](#)

- Implemented an end-to-end booking platform supporting 500+ users and handling 200+ monthly reservations.
- Structured backend workflows to streamline booking confirmations, cutting processing time by 40%.
- Introduced availability validation logic to eliminate scheduling conflicts and double bookings.

E-Commerce Web Application | Java, Spring Boot, REST APIs, MySQL, React.js

- Built a backend-driven e-commerce system enabling product listing, cart handling, and order processing.
- Integrated MySQL for persistent storage with optimized queries to improve response efficiency.
- Applied layered architecture principles to enhance scalability and ease future feature expansion.

Certifications

- **NPTEL – Programming in Java (2024):** Covered Core Java, Object-Oriented Programming, Multithreading, and Exception Handling.
- **NPTEL – Distributed Systems (Elite Silver, 2024):** Studied distributed architectures, consistency models, fault tolerance, and scalability concepts.

Education

B.E. in Computer Science and Engineering

October 2021 - May 2025

AAA College of Engineering and Technology, Sivakasi

CGPA: 8.17 / 10
